SUBJECT: Derek Grant Harvey-Zenk

As we discussed, enclosed are the Victim Impact Statements of Crystal Taman's parents, and her sister. I have briefly reviewed them, and suspect there are some portions of the Sveinsons statements that may be concerning. As a result, I am forwarding them to you for your review in terms of the appropriateness of the content, and any discussion you need to have with them as a result.

I will say also that often Crowns have actually had a higher tolerance for allowing certain things in these statements that we would ordinarily suggest are problematic, particularly in circumstances where there has been a fatality. I leave it to you to deal with that, with my apologies.

Once the final versions are done, as you know, you will need to distribute them to defense counsel and sentencing Judge, once known.

Also, as we discussed today, I will call Robert Taman, and also the Sveinsons to advise of the date being changed, and will let them know they will be contacted once the date is known. However, you may wish to let them know as well, should you be speaking with them before I do. Given the sensitivities in this matter, and the necessity to try to reach Robert first as the registered victim, I did just try to reach Robert now, and couldn't, so will try again.

I understand this has been a difficult case, and apologize for not being more helpful in this regard.
